On to, onto (*ɒ̃ntu*), *prep.* [The adv. On + the prep. To, used to express the notion conveyed in OE. by *on* prep. with the accusative, and often in ME. and mod.Eng. by *on* with simple objective (*On prep.* B.), so as to remove the ambiguity of *on*, *upon*, after certain verbs, e.g. 'to jump on deck'. *On to* thus has the same relation to *on* that *into* has to *in*. But while *in to, into*, was in use already by 900, the need for *on to, onto* appears not to have been felt before the 16th c., while its written recognition as a combination is still quite recent and limited. Yet, in the sense in which it corresponds to *into, onto* is in speech a real compound, the *n* being shortened by its rapid passage into the allied mute *t*, while in *on to*, as two words, the *n* is long and does not glide into the *t*. But by most writers *on to* is avoided, or used only when ambiguity cannot be otherwise avoided (cf. quots. 1777, 1837, 1865, 1870, 1873, 1881).

On to, onto, in this sense, must be carefully distinguished, first, from 2 ME. *onto*, a frequent medial variant of *unto*; and, secondly, from modern instances in which *on*, as the extension of a vb., is followed by *to* as a separate word, e.g. to walk on to the next station, to *drive on* to the sea, to *hang on* to a party, to *head on* to another point; a ship *lies broadside on* to the waves. Here the two words are no more connected than in *up to, down to, out to, along to, back to, home to*. Some who write or print *onto* have consistently assumed it in such connexions.]

Oo, a frequent ME. spelling of long *ā*, both open and close, as in *bare, alone* :—OE. *bāra, ān*. Hence in ME. a frequent spelling of O *butterfly*; and in Wycliff a name of the Greek long *ō* or Omega.

In the 16th c. *oo* was restricted to the 'close *ō*', normally representing OE. *ā*, as in *doore* :-*dōre*. In mod.Eng. this sound has been raised to (ū), of which sound therefore *oo* is the normal representative, as in *door, cocoa, cockatoo, cooper, kangaroo*, OE. *ā*. 2. *Anat.* Pertaining to or connected with the eye as the organ of sight, or with the sense of sight as a function of the brain; esp. in the names of bodily parts or structures. (Also used in *Path.* of diseases affecting, and in *Surg.* of operations performed on, such parts.)

Optic chiasm, or **commissure,** the commissure of the right and left optic nerves at the base of the brain. **Optic cup,** a cup-like depression in the front of the optic vesicle of the embryo; also that in the centre of the optic disk. **Optic disk,** the roundish slightly prominent disk on the retina at the entrance of the optic nerve. **Optic foramen,** the opening in the sphenoid bone through which the optic nerve passes. **Optic ganglion** = *optic lobe* (esp. when small, as in the higher animals). **Optic groove,** a groove on the upper surface of the sphenoid bone, in which the optic commissure lies. **Optic lobe,** each of the two right and left lobes of the dorsal part of the mid-brain, from which in part the optic nerves arise; in lower vertebrates large, and forming two hollow bulbs (*lobi optici*); in mammals small, covered in by other parts, and marked each by a cross-furrow, so as to form four prominences (*corpora quadrigemina*). **Optic nerve,** the second cranial nerve on each side esp. that part in front of the optic commissure, which enters the eyeball and terminates in the retina; they are the nerves of the special sense of sight. **Optic neuritis** (*Path.*), inflammation of the optic nerve. **Optic neurotomy** (*Surg.*), division of the optic nerve. **Optic pad,** an eye-bearing protuberance at the end of an arm of a *star-fish*. **Optic papilla** = *optic disk*. **Optic peduncle,** (*a*) *Zool.* the eye-stalk of a crustacean; (= OPHTHALMITE 3) (*b*) *Embryol.* the narrow tube connecting the optic vesicle with the fore-brain, from which the optic *tract* is developed. † **Optic sinew,** old name for the optic nerve. **Optic stalk** = *optic peduncle* (*a*) and (*b*); also the commissure of a snail or other mollusc. **Optic thalamus,** each of two large masses of nervo-matter in the brain, one on each side of the third ventricle, lying upon the crura cerebri, and forming with the corpora striata the basal ganglia of the brain; from them in part the optic nerves arise. **Optic tract,** that part of the optic nerve between its origin in the brain and the optic commissure. **Optic tubercle,** each of the corpora quadrigemina (see *optic lobe* above). **Optic vesicle,** a vesicle connected with the fore-brain of the embryo, from which the optic nerve and retina are developed.

Optimism (*ɒ*ptimɪz'm). [n. F. *optimisme*; in mod.L. *optimismus*, f. L. *optim-us* best: see -ISM.]

1. A name given to the doctrine propounded by Leibnitz, in his *Théodicée* (1710), that the actual world is the 'best of all possible worlds', being chosen by the Creator out of all the possible worlds which were present in his thoughts as that in which the most good would be obtained at the cost of the least evil. Also applied to doctrines of earlier or later thinkers to a like effect.

Leibnitz, in his *Théodicée*, uses *optimum* as a technical term, on the model of *maximum* and *minimum*. Hence the Jesuits who conducted the *Mémoires de Trévoux*, in the number for Feb. 1737, gave to his doctrine the name *optimisme*. It appears in the *Dict. Trévoux* 1752. It owes its general diffusion to the attack upon the doctrine by Voltaire in *Candide ou l'Optimisme* (1759); and was admitted into the *Dict. Acad.* in 1762.

[1737 *Mém. de Trévoux* (Févr.) 297 En termes de Dieu, il l'appelle *le raison du meilleur* ou plus avantageux succès, et l'enchaînement entre ces Hémisphères pensants, le système de l'Optimisme, ou l'Optimisme.]

Sci., etc.*, s.v., The optimism of Leibnitz was based on the following trilemma:—If this world be not the best possible, God must either, 1, not have known how to make a better, 2, not have been able, 3, not have chosen. The first proposition contradicts his omniscience, the second his omnipotence, the third his benevolence.

b. More generally applied to any view which supposes the ultimate predominance of good over evil in the universe.

The solitary O.Northumb. instance of adv. *ār* in A. 1, with Ormin's *Ar*, the *Ar*, *Are* of Cursor M., and Sc. *ere*, *Are*, was only in use in the ON. primitive adv. *ár* 'early'. To the same origin must be assigned, as far as form goes, the Early ME. and contin. *ar*, occas. *are*, in A. 11 (see having assumed an adverbial -*s* as in *thers*, *whers*, etc.). But the *o* must have in that of the OE. comparative *ǽr*, ME. *ār*, *ere*: as *ǽr* colored also by side with *ǽr* in the positive, it may have assumed also into the comparative, in which *ǽr* ERE, from OE. *ǽr*, was the only etymological form. In this sense Sc. still has *Are*. B. and C. have, besides *er*, *ere*, the form *or* in small (before 1225). In 13–14th c. *or* (*ore*) is found in the north, but appears soon to have been displaced by the mid. *er*, which is still the ordinary northern word. The northern uses of *Cursor M.* have the prepositional and conjunctive *or* (*ore*) but *er* occurs also in the Cott. text, and is frequent in Fairf. In Sc., Douglas finds the prep. *or* at first only in Barbour (*Color den Colbrandt der Frydenhouss or dar-ashuchet. Pieces, Halle* 1892, p. 256. *Ar* (*are*) occurs also in 13–14th c. northern writings: there it may have originated in an unstressed form of OE. *ǽr*. The relations between the positive and comparative of this adv. present complications in all the cognate langs. In all the Scan. groups, also the comparative has developed prepositional and conjunctive uses, as in English.)

B. Signification.

I. *generally.* A particle co-ordinating two (or more) words, phrases, or clauses, between which there is an alternative.

Things so co-ordinated may differ in nature, or quality, or severity in quantity, to which case the one may include the other, as in 'it will cost a pound or thirty shillings', 'two or three minutes', 'a word or two'. The second member may also express a correction or modification of the first, which may be strengthened by repeating *or* to *or even*, *or rather*, *or at least*.

b. When singular subjects (sb. or pron.) are co-ordinated by *or*, strict logic and the rules of modern grammarians require the vb. and following pronouns to be singular; but at all times there has been a tendency to use the plural with two or more singular subjects when their mutual exclusion is not emphasized.

When the subjects differ in number or person, the rule is that the vb. and pronouns should agree with the last or nearest, e.g. 'I or they are to blame', 'I, or them, or he is the author of it' (Lindley Murray); but such constructions are apt to seem stiff and pedantic, and are consequently avoided. The question of gender causes further complication, the worst of a 3rd pers. pron. of common gender. To say either 'if he or she has his or her friends with him or her' is clumsy and pedantic, which is avoided by saying 'have their friends with them' or 'Your brother or sister will lead their ride'. Those skilful in appear to have been felt at all times, and have been sometimes guided by making the verb immediately precede or follow the first subject, and agree with it.

2. The alternative expressed by *or* is emphasized by prefixing to the first member, or adding after the last, the associated adverb Either, formerly Ouzen or Outher (the latter still in dialect use): e. g. 'you may have either an apple or a pear'; 'I could eat an apple or a pear either'.

The primary function of *either*, *etc.*, is to emphasize the perfect indifference of the two (or more) things or persons; e. g. 'you may take either the medal or the value' = the medal and its value are equally at your option, you may take either; but a secondary function is to emphasize the mutual exclusiveness, = either of the two, but not both. For full illustration, see Either, Ouzen, Outher; the following are early examples of the various forms:

?a 1300 *Cursor M.* 3625 (Cott.) Þat I sold ofper (Gött. either) here ete nouȝt. Or he þe folc vn-rotbuld. *Ibid.* 3638 (Cott.) Or, var. *hor*, HER *Obs. pass. pron.*, 'their'.

Or, obs. form of ORE, *d'or* (OVER), YORE.

Or-, *pref.*, frequent in OE., retained in a few words in ME., now *obs.* exc. in ORDEAL and perh. OUT-s, where it is no longer recognised as a significant element. OE. *or-* was the stressed form (used in nominal compounds), corresp. to Goth. *us-*, *ur-*, ON. *ór-*, *ór-*, OHG., Ger. *ur-*, OS. *ur-*, *or-*, MDu. *or-*, *oer-*, Du. *oer-*, orig. an adv. and prep., meaning 'out'. The unstressed form (in verbal compounds) was in OHG. *ur-*, *ar-*, *ir-*, MHG., MLG., MDu., Ger., Du. *er-*, ON., OE. *a-*. Thus OE. *orcést*, OS. *urcâsti*, MDu. *orcdeel*, MLG. *urdêl*, OHG. *urcunti*, Ger. *urteil* decision, judgement ; OE. *ofridan*, OS. *afrîdan*, OHG. *arteilen*, Ger. *erteilen* to decide, allot, share. The primary sense was '*out*', as in Goth. and OHG. *ûtvunns* 'outrunning, exit, exodus', ON. *útfor* out-going, departure ; thence various derived senses, of which OE. had 'out, completely, to an end', as in *orfeorm* 'thinking out, contrivance, skill, intelligence' ; 'out and out', 'extreme', in *orlégde* 'extreme old age' ; 'outwardly, manifestly', in *orcnáwe* 'recognizable', *orgléaw* 'clearly perceptible, manifest' ; and esp. 'without, void of, bereft of', as in the adjs. *orcnáwe* 'unconscious, insensate', *ordéad* 'bereft of courage, despairing', *orcheard* 'lifeless', *orsorge* 'without hope, desperate', *orsorgnes* 'without trust, faithless', *orsorg* 'without anxiety, secure'. (Cf. L. adjs. in *ex-*, as *exanimis*, *anxius*, *exsors*, *exsanguis*.) In this last sense the prefix survived in early ME. : see ORDAYN, ORDIO, ORDALYE, ORFRAY.

-or, a termination of words, and form of various suffixes, of Latin origin.

Latin long *ō* in early OF. was represented by a close sound between *oo* and *ou*, written variously *o* and *u*, as in L. *honōrem*, OF. *onur*, *onor*. In Anglo-Fr. the sound sank into *ou* and came c 1300 to be written *ur* (*eur*). In continental Fr., on the other hand, the sound passed at length into *eu* (*œu*), *u* (*œu*), *eu*, *œu*. The earliest alleged words in ME. had *o* or *u* (*uor*, *uour*), but the regular representation after 1300 was that of Anglo-Fr. *ur* (*eur*, *œur*). In many instances this is still retained ; but, as the Renascence, many of the *-eur* words, which in other tongues were like these L. originals, were conformed to the L. in *-or* ; and nearly all words taken then or later directly from L. were spelt *-or*, though, even in these words, there was at first a considerable vacillation between *-or* and *-our*. In Great Britain the traditional *-our* is still written in many of the words in which it was retained in the 16th c., though not a few of these, as *ancestour*, *author*, *error*, *horror*, *peior*, *senatour*, *tailor*, are now spelt with *-or*, which spelling is extended in American usage to all the *-our* words.

This termination appears in the following suffixes :

1. *-or* (formerly often *-our*), representing ultimately L. *-or*, *-ōrem*, in nouns of condition from nouns, vbs. in *-ire*, less usually from other vbs., as *error*, *horror*, *liquor*, *pallor*, *stupor*, *tumor*, *terror*, *torpor*, *tremor*, etc. Such of these as existed in ME. were formerly spelt with *-our*, e.g. *errour*, *horrour*, *licour*, *tenour*. In other words of the same class, as *ardour*, *favour*, *fervour*, *humour*, *labour*, *rigour*, *rumour*, *vigour*, as also in some words not directly connected with extant L. verbs, as *colour*, *honour*, *odour*, *-our* is generally retained in British usage, but American usage spells these also with *-or* : *ardor*, *favor*, *labor*, *color*, *honor*, etc.

2. *-or* (formerly often *-our*), repr. L. *-or*, *-trix* of agent-nouns, formed on stems identical with the ppl. or 'supine' stems of verbs. Of these there are three varieties :

a. Those repr. L. agent-nouns other than those in *-ātor*, *-ītor*, *-ĭtor*, *-ātor* ; as *actor*, *assessor*, *author*, *captor*, *censor*, *confessor*, *doctor*, *elector*, *executor*, *factor*, *flexor*, *inventor*, *lictor*, *oppressor*, *pastor*, *possessor*, *professor*, *rector*, *sculptor*, *spousor*, *successor*, *transgressor*, *tutor*, *victor*. These are of different ages, going back to OF. words in *-or*, *-our*, AF. in *-our* = F. *-eur*, or L. in *-or*. So far as they existed in ME., they were then spelt *-our*, e.g. *actour*, *assessour*, *authour*, *censour*, *confessour*, *doctour*, *doctour*, etc. ; they are now all conformed to the L. spelling in *-or*.

b. Agent-nouns in L. *-ātor*, *-ītor*, *-ĭtor*, *-ātor*, in coming down in living use into OF., were regularly reduced from *-ëör-eur*, etc., through *-eðr* to *-eir*, *-eür*, AF. *-eour* which became in ME. *-our*, and in F. *-eur*, and thus fell together with those from simple *-ōr-eur* in **a**. Such are *harrateur*, *coureur*, (*=-coureür-eur*), *conqueror*, *donateur*, *emperor* (*=emperëör-eur*), *governeur*, *juree*, *liseur*, *solliciteur*, *vendeur*, *visiteur* (*=visitëör-eur*). To this group also belongs *antiseur* (AF. *cauceiur*—OF. *saliseür*, *salvedör*, L. *salvātōr-em*), which has preserved the vowel before *-our*. To these may be added agent-nouns formed in Fr. or AF. on the vb. stem, in imitation of those in *-ātor*, *-eur*, *-our*, repr. L. *-ātrix*, etc., as *paringer*, *paringour*, *tailler*, *graueler*, *marriour* (AF. *marreiour*), *l. barretor* to war). From want of evidence it is sometimes uncertain whether the agent-noun was already formed in late L. in *-ātor*, *-ītor*, or in Fr. after these suffixes had been reduced to *-eür* and *-eur*, AF. *-eour*.

c. Agent-nouns in *-ātor*, *-ītor*, *-ĭtor*, *-ātor*, *-ātor*, adopted in later times in Fr., or in Eng., retain *t*, appealing in French as *-ateur*, *-teur*, etc., and have now in Eng. the same written form as in L., e.g. *administrator*, *agitator*, *creator*, *curator*, *dictator*, *equator*, *gladiator*, *imitator*, *legislator*, *navigator*, *spectator*, *translator*, *vindicator* ; *orator*, *procurator*, *senator* ; *auditor*, *creditor*, *editor*, *janitor*, *monitor*, *scrutator* ; *executor*. These are of different ages : some from OF. or AF. (in which case they formerly had *-our*, as *creatour*, *creditour*, *dictatour*, *oratour*, *scrutiour*) ; some of later formation immediately from L., which have had the *-or* form from the first. The pronunciation varies greatly, the stress being sometimes as in the L. nominative (*créator*, *créditor*), sometimes on the second syllable before the stressed vowel of the AF. and L. accusative (in which a secondary stress fell originally in ME.), as in *auditor* (*audītor-em*, *audītor-em*), *orator* (*ōrator-em*, *ōrātor-em*), *senator* (*senātor-em*, *cognitor* (*cognītor-em*, *scrutator* (*scrutātor-em*, *scrutīn-em*), *executor* (*executōr-em*, *executōr-em*), sometimes corresponding with that of the Eng. vb., as *admi-nistrator*, *agitator*, *l. emulator*, *procurator*, or otherwise shifted, as *procurator*. In some cases two forms exist, as *curator* after L. nom., *curatour* after *curatōrem*, *cūrātōrem*.

d. *-or* is sometimes an alteration of another suffix, as of L. *-ārium*, F. *-ier*, AF. *-er*, in *bachelor*, *chancellor*, *herbier*, or of Eng. *-er*—OE. *-ere*, as *sailor*, *tailor*.

The frequent appearance of ME. *-our*, mod. *-or*, in legal terms denoting the person acting, as opposed to the person acted upon in cf. *-ee*, e.g. *donor* : *donee*, *grantor* : *grantee*, *mortgagor* : *mortgagee*, has imparted a kind of technical or professional character to the ending, and explains the differentiation of *settler*, one who sells professionally, from *settler*. In ME. there was a tendency to confuse the endings *-er* and *-our* (lodged prob. by the OF. declension nom. *-ere* : L. *-ātor*, acc. *-ātor-em*, etc. : L. *-ātrem*) : thus *butcher*, *officer*, *porter*, *sailer*, *sawyer*, *taylor*, etc. are found also with the ending *-our*. On the other hand, in a large number of words, the original *-our*, *-or* has, since the 15th c., been exchanged for the *-er* of agent-nouns of English derivation ; such are *barber*, *broker*, *chaunter*, *dresser*, *labourer*, *plaster*, *preacher*, *robber*, *sinner* or *sigher*, in all which the earlier *-our*, *-or*, is the etymological form.

3. *-or* [*-our*] sometimes represents F. *-oir*, from various sources, as *manoir*, OF. *manoir*, *manoir*, L. *manēre* ; *mirror*, F. *miroir*, L. **mīrātōrium* ; so with *-our*, *parlour*, F. *parloir*, L. **parabolātōrium*.

4. *-or*, repr. ME. and AF. *-our*, F. *-eur*, L. *-or*, *-ōrem*, a variant of *-ur*, suffix of the comparative degree of adjs., in *major*, *minor*. See *-ER* 2.

2. A response, decision, or message, given usually by a priest or priestess of a god, and as was supposed, by his inspiration, at the shrine or seat where the deity was supposed to be thus accessible to inquirers. These responses were for the most part obscure or ambiguous; to which allusion is made in later senses of the word and its derivatives.

Orange (*prindʒ*), *sb.*[1]

1. The name of a town on the river Rhone in France, formerly the capital of a small principality of the same name, which passed in 1530 into the possession of the House of Nassau, and as to the territories of William III of England, styled princes of Orange-Nassau. On the death of William III, the territory of Orange was acquired by Louis XIV, and added to France; but the title continued to be held by the cousin of William and his descendants, who now constitute the royal line of Holland. In Eng. Hist., 'William of Orange' is an appellation of William III.

The hereditary coincidence of this name with that of the fruit and colour (Orange, *sb.*[2]), made the wearing of orange ribbons, scarfs, cockades, orange-lilies, etc., a symbol of attachment to William III, and to the principles of the Revolution settlement of 1689, and led to their use by the Orange lodges and Orangemen.

2. *Eng. Hist.*, (*attrib.*) Applied to the ultra-Protestant party in Ireland, in reference to the secret Association of Orangemen formed in 1795: cf. ORANGEMAN.

The exact origin of this use of 'Orange' is somewhat obscure. But it is supposed that 'the two Copes' of 1792 were members of a celebrated lodge of Freemasons then existing in Belfast, styled 'The Orange Lodge', and that these their adherents were known as 'Orange boys' and 'Orangemen'. The name of this lodge probably had reference to William of Orange, as to that one of orange-lodges of the anniversaries at which his memory was celebrated; and it was, no doubt, in this sense that the term became perpetuated as a party name. The first two quots. which follow refer to the Orange Lodge of Freemasons.

Orange-blossom. The white fragrant blossom of the orange-tree. Worn by brides in wreaths, trimmings, etc., or carried in bouquets at the marriage ceremony.

This custom appears to have been introduced from France c 1820–30. According to Littré, 'Women at their marriage wear a crown of orange buds and blossoms; hence the orange-blossom is taken as a symbol of marriage'. (Thackeray's explanation of the symbolism appears to be his own.)

Teutonic word: in OFris. *ordēl*, *ordēl*, OS. *ordēl* (MDu. *ordeel*, MLG. *ordēl*, Du. *oordeel*), OHG. *urteil* (MHG. *urteil*, *urteil*, mod.Ger. *urteil*) (all neut., but in OHG., MHG. also fem.) judgement, judicial decision; thence med.L. *ordālium*, *ordālia*, OF. *ordel* (Diez), F. *ordalie*. The *dā*, of which the OTeut. type would be **ausdiþiz*, is a nominal compound belonging to a compound vb. of Goth. type **uz-daiþjan*, in OHG. *irteilen*, *irteilen*, MHG. and Ger. *ertheilen*, OS. *adhēlian*, OE. *ādēlan*, lit. 'to deal out'; 'allot in shares'; hence 'to allot or adjudge to one his share, decide, give judgement'. The *th* has come down in the cognate langs. in the general sense of 'judgement, judicial decision'; but in OE. had become restricted, in historical times, to ancient modes of trial which survived from an earlier stage of society.

The word has not been found in ME., except in a single instance in Chaucer's *Troylus* (prob. from Lydg. or French). Its modern historical use begins c 1275, partly as an Englishing of med.L. *ordālium*, partly as an adaptation of the OE. word. The true repr. of OE. *ordāl* would be *ordēl*: the received spelling *ordeal* appears then in Verstegan, who associates the word with *deal* 'part'. OE. *ādēl*, *-ēl* 'is best understood for that or right, deal, for parte, as yet we use it, as an ordeal, is asmuch as to say as five-parts, and at this present it is a word generally used in Germanie, & the Netherlands, in stede of dome or iudgement.' *Obs. Lambd. Gr.* Ignorance of the etymological relationship has led to the pronunciation *ordeal*, as in *to reveal*, *conceal*, [*zeal*.]

1. An ancient mode of trial among the Teutonic peoples, retained in England till after the Norman Period, in which an accused or suspected person was subjected to some physical test fraught with danger, such as the plunging of the hand in boiling water, the carrying of hot iron, walking barefoot and blindfold between red-hot ploughshares, etc., the result being regarded as the immediate judgement of the Deity. Hence applied to analogous modes of determining innocence or guilt, still practised in various parts of the East, and among the less civilized races generally.

With the exception of wager of battle, which is sometimes included in the class, the various forms of ordeal were abolished in England 1215–19.

Order (*ɔ̃ɹdəɹ*), *sb.* Forms: 3–6 **ordre**, 4– **order**, (4–5 **-dr**, **-yr**, 4–6 **-ere**, **-er**, 5 **wordre**). [ME. a. OF. *ordre* (11th c.) =*Sp.ordre*, ad. L. *ordin-em* (nom. *ordo*) row, series, course, order, array, etc.

Many senses of the word had been developed before it was adopted in OF. and Eng. The order of the succession of the senses here is consequently not that of their logical development in L., another and mediæval. The specific senses of 'order of angels' and 'monastic order' appear in the Ancren Riwle; many of the ecclesiastical uses, with that of 'a rank of the community', are found by 1300; but the primary sense of 'row or rank' appears first in the 16th c. The arrangement here followed is in many points merely provisional.

I. Rank generally; a rank, grade, class.

1. A rank, row, series; one of several parallel series behind or above one another. *Obs.* or *Arch.*

1583 W. Fulke *Meteors* (1640) 16/1 Thick clouds over us, and commonly a double order of clouds, one above an other. 1589 Camden *Pleasures* 1, 6. *Cassiopea, Terras aperiuntur ordine remi*, that is, oared with three orders of oars in a side. 1807 Vowell *Funeral Russia* (1858) 459 It bears three orders or rows of horns on the head. 1818 A. Willet *Memphis Lond.* 371 Kneels side had three fine orders or ranckes of horns. 1725 P. Thomas *Trnsl. Williams *Poems & Transl.* 9 And wheels, a countless order, each like each.

b. *Arch.* A series of mouldings. (See also 9.)

1842 Pugin *Gothic Hintelligr* 10 An arch of two or more orders, in one which is recessed by so many successive planes or retiring arches, each placed behind and beneath the next before it. 1879 Jas. G. Bourne *Mod. Archit.* I. 104 This suggested the system of subordinating the rims, or recessing them, one behind the other, so as to divide the arch into what are called orders.

2. A rank of the community, consisting of persons of the same status (esp. in relation to other ranks higher or lower); a social division, grade, or stratum; esp. in the phrases *higher, lower orders*.

II. Rank in specific departments.

5. Each of the nine ranks or grades of angels, according to mediæval angelology. Also, any analogous class of spiritual or desirable beings.

The nine orders of angels are enumerated first in the Pseudo-Dionysian scheme (1), according to which there are three hierarchies, each including three orders: these are seraphim, cherubim, thrones; dominations, principalities, powers; virtues, archangels, angels. (The names are derived from the passages of cherubim and seraphim in the O.T., and from words used by St. Paul in enumerating things in heaven and in the earth, in Colosse. i. 16, Ephes. i. 21.)

c 1205 *Lay.* 8 Þa þeoh þisne engleuuiten ordren. c 1300 *Cursor M.* 430 Of angels wald he formed ten, Þe nobil of ordres þir ix. ordeyned had þeir stire. c 1440 *Promp. 6. *Eccl.* **a.** A grade or rank in the Christian ministry, or in an ecclesiastical hierarchy.

The orders of the constituted Western Church are those of bishop, priest, deacon, archdeacon, prelate, preacher, reader, and catechist or doctor; variously counted as eight or seven, according as bishop is or is not considered a distinct order from priest. Those of bishop, priest, deacon, and minor (qh. of subdeacon, are the greater, sacred, or holy orders; the others are the minor orders. The Anglican Church recognizes only the three holy orders of bishop, priest, and deacon. In most branches of the Eastern Church the orders recognized are those of bishop, priest, deacon, subdeacon, and reader, to which were add that of singer (*psaltes*).

Lond. Disp.* (1884) II. 260 Holy orders, which are the orders of bishops (including archbishops), priests, and deacons.

b. The rank, status, or position of a clergyman or ordained minister of the Church. Now always *pl.*, more fully *holy orders*. Hence the phrases *to take orders*, to enter the ministry of the Church, to be ordained; *in orders*, in the position of an ordained clergyman or minister of the Church; *in deacon's orders*, *in priest's or full orders*.

This has some affinities with sense 3 (see quot. 1552 from Hooker there). Has the pl. form in *holy orders*, *to be in orders*, *to take orders*, etc. exclusively refers to the different orders within the ministry, rather than to the ministerial or clerical order as a class or body of men.

These constitute the *Five Orders of Classical Architecture*, rising above each other in relative height, lightness, and decoration, viz. the Tuscan, Doric, Ionic, Corinthian, and Composite: of which the Doric, Ionic, and Corinthian are the original Greek orders, the Tuscan and Composite, Roman modifications or variations.

As to the distinction between ordinance and statute, see Hallam *Mid. Ages* (1878) III. 170, II. Stubbs *Const. Hist.* II. 576, § 290. In Eng. Hist. the decrees of the Ordainers (with the king's assent) in 1310-11 were 'ordinances'; the name is also given to the *Ordinances of the Forest* (1306) & to Rd. II., and the *Ordinance of the Staple* (27 Ed. III. st. 2), 1354. The Acts of the Long Parliament also often were at first called *Ordinances*: one of them was the *Self-denying Ordinance* of 1645, ordaining that no member of parliament should thenceforth hold any civil or military office. After 1649 the name 'act' was officially used; but as all these 'acts' were expunged from the Statute-book at the Restoration, they are usually referred to as 'ordinances'. In reference to French History, 'the Ordinances' are esp. those of Charles X in 1830, overthrowing the constitution, and superseding the liberty of the press. See also Ordonnance 2, 3 b.

(Correlative to ABSCISSA.)

The name *ordinate*, formerly more fully *ordinate applicate*, is derived from the Latin phrase *linea (or chorda) ordinatim applicata*, used in the 16th c. Latin translation of Apollonius of Perga.

1637 *Apollonii Pergæi Conicorum* I. xvi. Definitio 4. Duæ autem rectæ per contactum ordinate applicatæ...Secunda Diametros vocabo. 1656 CHARLTON *In Bignod Conc. Sol. II. The public establishment, or branch of the public service, concerned with the supply of military stores and materials, the management of the artillery, etc.

Board of Ordnance, a board, partly military and partly civil, which had the management of all affairs relating to the artillery, engineers, and the materiel of the Army; it was under the Master-General, assisted by a Lieutenant-General, a Surveyor-General, a Principal Storekeeper, Clerks of the Ordnance, and various other officers. After having existed from the reign of Henry VIII, it was dissolved in 1855, most of its functions as regards materiel being now discharged by the *Army Ordnance Department*.

The organization of the Ordnance Department has undergone numerous transformations since 1855. From 1870 to 1887, the *Surveyor-General of Ordnance* was titled the Commissioner-Chief, and was a Financial Secretary; one of three officers to whom the secretary of state for war was then delegated, his position being all civil administrative duties except the Pay Department, with the purchase, construction, and charge of materiel. After 1887 these duties were divided among various officials, e.g., the Controller-General of Ordnance Stores, Director-General of Ordnance Factories, etc. In 1895 they were once more grouped under an *Inspector-General of Ordnance*, for whom a *Director-General* was substituted by an Order in Council of 7 March, 1899.

Ore [1] (ōəz). Forms: a. 1 ōra, 4 ōre, 3–7 oore, 5–6 oure, 6 (ower, owre), ur, 6–7 ure; β. (1 ār), 3 or, 4 oor, 5– ore, (6 wore, 6–8 oare, 7–8 oar.) [Two types of this word are found from 14th to 17th c.: viz. (1) *ar(e, ore, oare, ure, or)*, of which (as shown by spelling and by rimes) the regular mod. repr. would be *ore* (ōəz), and which corresponds to OE. *ōra* wk. masc. 'unwrought metal', 'ore', contrib. to Du. *oer*, LG. (E. Fris.) *ār*, of uncertain origin; (2) M.E. *ār*, in 17–18th c. *oar*, mod. *ore*, which answers phonetically to OE. *ār* (also *ār*) 'brass' = OS. *ār* (in *ārin* 'brazen'), MDu. *oer*, OHG., MHG. *ēr*, ON. *eir*, Goth. *aiz* str. neut. 'brass' = L. *æs, ær-* 'brass', Skr. *ayas* 'metal'. It would appear that, about the 12th c., OE. *ār* began to be identified in sense with OE. *ōra*, and that forms descended from both mentioned side by side until the 17th c., when the forms from *ōra* became obs., or were levelled under those from *ār*. Thus the mod.Eng. word appears to derive its sense from OE. *ōra*, but its form from OE. *ār* 'brass', which may have been extended to the sense 'metal', and thus to 'ore'. It is possible that, in very modern Eng., the form *ore* might itself have passed into (ōəz), as in the spoken forms of *door, floor*, and southern pronunc. of *more, poor*; but this would not explain the double forms from 13th to 17th c., nor the 16th c. *oar*.]

In Greek, orig. 'that with which one works' (allied formation from *ἔργ-ω* work), tool, instrument, spec. musical instrument, surgical instrument, also bodily organ as instrument of action or faculty. In L., instrument, engine, musical instrument generally, pipe, in Christian writers also 'church-organ'. Augustine (c 400), on Ps. lvi. 9(10) 'All musical instruments are called organa. But alone is that called *organum*, which is large and inflated by bellows, but whatever is fitted to accompany singing, and is corporeal, which he who sings uses as an instrument, is called *organum*.' To the same effect Isidore (c. 630), in Eng. adopted first in the musical sense ; in OE. in the more general sense of 'musical instrument', including, no doubt, that of 'church-organ'.]

2. *spec.* A musical instrument (in its modern form the largest and most comprehensive of all), consisting of a number of pipes, supplied with *wind* or compressed air by means of bellows, and sounded by means of keys, which on being pressed down admit the wind to the pipes by opening valves or *pallets*.

In the modern organ the pipes are distributed into sets or *stops* of uniform qualities of tone, the admission of wind to the several stops being controlled by handles or *draw-stops*, drawn in and out by hand or by mechanism worked by special pedals (*combination-pedals*) ; and the stops are arranged in groups, each separate group forming a *partial organ* (see 4) and being controlled by a separate Keyboard ; there are usually from two to five in number, one of the keyboards (consisting of pedals) played with the feet, the rest being manually played with the hands ; these can be connected in various ways by couplers so as to sound together.

From its great size and dignity of tone the organ has been distinctively the church instrument from early Christian times, and in modern times is also used in concert-halls and other buildings.

The instrument has of course undergone important changes since the 4th c., when it is first referred to in L. writers, and

every close the date of the earliest Engl. reference. According to Cowell's *Dict. Mus.* II. 326, "At the commencement of the 8th c. the use of the organ was appreciated, and the art of making it was known in England". The earliest mentioned Organ that proved in Latin documents, or English ones, specifically by this name are known in OE. or Early ME.

The termination is originally adjectival (substantival only by ellipsis), and app. arose in connexion with obs. in *-ōriare*, *-ōrius*, Eng. *-ORY*; thus late L. had *territōri-ālis* from *territōrium*. But it has been extended in Eng. to form derivatives from L. adjs. in *-ōrius*, *-ōrius*, from agent-nouns in *-tor*, *-sor*, as *curatori-al*, *dictatori-al*, *picturi-al*, *piscatori-al*, *procuratori-al*, *professori-al*, *sartori-al*, *senatori-al*, and others formed directly as agent-nouns themselves or on the cognate *ppl.* stem of the vb., as *equatorial*, *meditorial*. In sense, these adjs. in *-orial* are usually identical with those in *-ory*, and the two forms are not rarely found side by side (e.g. *pictorial*, *picturory*); but the former is preferred for the adj. when there is a sb. in *-ory* (*purgatory*, *purgatorial*). Words in *-orial* from agent-nouns are chiefly of Eng. formation, the compound suffix being rare in Fr.

Oriohale (*ōriōhălē*). Also 6 **orioalohe,** 7 **-ohalch**; and in Lat. form **orichalcum** (also 7 **aurichale**(h'um). [ad. L. *orichalc-um*, a. Gr. ὀρείχαλκον, lit. 'mountain-copper', f. ὄρος, *ὀρε-* mountain + χάλκος copper, applied to a yellow copper ore or brass. In later L. made into *aurichalcum*, after L. *aureus gold*, as if 'golden copper'.] Some yellow ore or alloy of copper, highly prized by the ancients; perhaps brass.

Applied by Strabo to brass, though some Greek writers treated ὀρείχαλκος as a distinct metal; in the Middle Ages, *aurichalcum* is often mentioned as a very precious metal known only by report.

Oriel (*ōrĭĕl*). Also 3 **oryel, oriell,** 3–8 **oryall,** 6–8 **oriall,** 7 **orial, oryal,** 7–8 **oriel.** (9 **oriole.**) [ME. a. OF. *oriol* (*oriiol, oreoriol*) (in Godefroy) 'porch, passage, corridor, gallery', mod.F. (? from Fr.) *oriolum* (in Matt. Paris, *a* 1259) 'porch, entrance-hall, antechamber'.

Of unknown origin: for the conjecture that the *F.* or med.L. might be altered from L. *aureolum* 'golden, gilded', in sense 'gilded chamber', there is no historical foundation; the Fr. forms in *-ie*, as given to an original *i* not one.]

Although much research has been expended upon the history of this word, and upon the development of the current use in several senses, the precise history remains to many points obscure and perplexed. Mr. W. Harper in an exhaustive article in *Archæologia* XXIII. (1831) 114, asserts, and (1) proves, for *oriel* the senses, 'parlour, porch (attached to an edifice), (detached) pavilion, hall, upper floor, gallery for minstrels'. It is also shown in Parker's *Glossary, Archit.*, that the name was applied to a gallery or upper chamber in the west end of a domestic chapel, or to a small private apartment having a window looking into the chapel: see also *Bentley's Ch. Enc.* 1880 Jan. 296. The earliest sense known is that of 'portico, passage, corridor, gallery', derived from OFr. (Godef.) and med.L., and it is probable that 'oriel window' meant at first 'window in a gallery or balcony'. Most of the earlier senses claimed by Mr. Harper are found only in L. context, examples in Eng. being scarce. The modern Gondish use of *oriel* is however an important link.

2. A succulent herbaceous plant, *Sedum Telephium*, with smooth fleshy leaves and corymbs of numerous purple flowers; a native of Britain, and also a well-known inmate of the cottage garden, being esteemed as a vulnerary. From its tenacity of life, one of its popular names is *Live-long*.

The connection between this and the preceding sense is not clear; it has been conjectured that the name *orpine* was given first on account of their colour to one or more of the yellow stonecrops, was extended to the genus *Sedum* as a whole, and was subsequently restricted to *S. Telephium*. In support of this, Lyte gives *orpin* as a generic name for *Sedum*, and calls *S. Telephium*, *orpin rejetton*, and *S. acre* 'Wall Pepper? *orpin acre*'; but Hatzfeld and Darmesteter know only the former as *orpin*.

Orthite (*ɔ·ɹ*þəit). *Min.* [= Ger. *orthit* (Hermes, 1817), f. Gr. *ὀρθός* straight: see -ITE 1.] A variety of ALLANITE, found in long slender crystals, or straight masses.

1819 in T. Thomson *Ann. Philos.* IX. 160 Orthite so named because it always forms straight rods. 1868 Dana *Min.* (ed. 5) 429 Orthite occurs in acicular crystals sometimes a foot long; at Finbo near Falun, and at Vitterby in Sweden.

Hence **Orthi·tic** *a.*, of the nature of orthite.

1845 Hussak *Dict. Geol., Allanite*, an orthitic inclusion.

Ortho-, before a vowel sometimes orth-, combining form of Gr. *ὀρθός* 'straight, right', as element of various words, chiefly scientific or technical, sometimes in the physical sense 'straight', sometimes in the ethical sense 'right, correct, proper'.

I. In technical words generally (for the more important of which see their alphabetical places):

2. In *Chemistry*. **a.** *Ortho-* is used to distinguish one class of acids and their salts from another classed by the prefix *meta-*, which contain the same elements in different proportions, the *meta*-acid containing a molecule of H_2O less than the *ortho*- acid, the *ortho*- salt being also the more basic and the *meta*- salt the less basic. Thus *orthophosphoric acid* H_3PO_4, *metaphosphoric acid* HPO_3; *sodium orthophosphate* Na_3PO_4, *sodium metaphosphate* $NaPO_3$. So *orthoarsenic, orthotungstic, orthosilicate, orthostannate*, etc. This use of *ortho-* originated with Prof. Odling in 1859, *meta-* having been introduced by Graham in 1833-8. With the names of isomeric benzene di-derivatives, *ortho-* is applied to those in which two successive hydrogen atoms are replaced by another element or radical, as distinguished from *meta-* and *para-* derivatives, in which the two atoms are not successive, but unsymmetrically or symmetrically disposed respectively. Examples: *orthobibromobenzene, orthobromonitrobenz, orthoparatoluol, orthocresol*, etc. (This was introduced by Körner, 1867, in *Bronsoni Acad. Sc. Bull.* XXIV. 166–185.)

As ortho-, although usually prefixed without a hyphen, has always its own distinct meaning, chemical names in *ortho-* are not separately treated in this Dictionary.

1859 Odling in *L. & E. Philos. Mag.* Ser. iv. XXVII. 388 On *Ortho-* and *Meta-*salts. Intermediates between common or orthophosphates and metaphosphates we have several varieties of compounds, among which the best defined are the pyrophosphates, salts which result from the union of an atom of orthophosphoric acid with an atom of monophosphoric. 1868 Watts *Dict. Chem.* IV. 438 The prefixes *ortho-* and *meta-* have been introduced...to denote two classes of salts...the more basic salts being called *ortho-* and the less basic, *meta-* salts. 1873 — *Fownes' Chem.* (ed. 11) 122 The aqueous solution ...deposits *orthophosphoric* acid in prismatic crystals. 1878 Harkut *Min. Wool.* (ed. 2) 10 Neutral solutions of the orthophosphates...give precipitates with salts of lime and baryta. 1877 Watts *Fownes' Chem.* II. 410 The di-derivatives of benzene ... exhibit three such modifications which are distinguished by the prefixes *ortho-, meta-*, and *para-*: thus ...Orthodichlorobenzene, $C_6H_4Cl_2$ $C_6H_4(Cl)_2(1,2)$, Metadichlorobenzene, $C_6H_4Cl_2$ $C_6H_4(Cl)_2(1,3)$, Paradichlorobenzene, $C_6H_4Cl_2$ $C_6H_4(Cl)_2(1,4)$.

Orthocentre (*ɔ·ɹθɒsɛntəɹ*). *Geom.* [f. Ortho- + Centre.] The point at which the perpendiculars from the angles of a triangle on the opposite sides intersect.

1867 Bennet *Camb. Math. Jour.* 132 If a rectangular hyperbola circumscribe a triangle, it passes through the orthocentre. 1883 Leudesdorf *Cremona's Proj. Geom.* 213 The directions of all parabolas inscribed in a given triangle meet in the same point, viz. the orthocentre of the triangle.

Orthocephalic (*ɔ·ɹθɒsɪfæ·lɪk*), *a. Ethnol.* [f. Ortho- 'right, correct' + Gr. *κεφαλή* head + -ic: cf. *cephalic*.] Applied to skulls of which the breadth is from about $\frac{3}{4}$ to $\frac{4}{5}$ of the length (intermediate between *brachycephalic* and *dolichocephalic*); or, according to some, of which the height is from $\frac{2}{3}$ to $\frac{3}{4}$ of the length, or of which the height is $\frac{4}{5}$ of the breadth.

1869 Lubbock *Prehist. Times* v. (1890) 129 Now if we class those skulls in which the relation of the breadth to the length is from 75 to 80 as medium heads, ... Orthocephalic. 1886 Huxley *Prehist. Rem. Caithn.* 88 The skull is orthocephalic, the cephalic index being 0.78.

So **Orthocephalous** (*-sɛfələs*), *a.* = prec.: **Orthocephaly**, the condition of being orthocephalic.

1874 Darwin *Descent of Man* II. 140 In the round barrows, ... they belong mainly to the dolicocephalic division, although some are orthocephalous. 1892 *Syd. Soc. Lex.*, *Orthocephaly*, the condition of a skull which, according to the Frankfort agreement, possesses a vertical index of from 70° to 75°. According to Welcker, an orthocephalous skull is one whose height is to its width as 20 to 21.

† Orthoceras (*ɔɹθɒ·sɪræs*). *Palæont.* Pl. orthoceratas (*ɔɹθɒsɛ·rətəz*). [f. Ortho- 'straight' + Gr. *κέρας*, pl. *κέρατα* horn.] An extinct genus of cephalopods, having long straight (or nearly straight) chambered shells; a fossil shell of this genus.

1830 Lyell *Princ. Geol.* I. 122 The gigantic orthoceratas of this era being, to recent multilocular shells, what the fossil ferns, equisetæ, and other plants of the coal strata, are in comparison with plants now growing within the tropics.

1875 — *Antiq. Man* 10, 504 It is said truly that the ammonites, orthoceras, and nautilus of these ancient rocks were of the multilocular division.

Hence **Orthoceran** (*ɔɹθɒ·sɪrən*) *a.*, belonging to the *Orthoceratida*.

1884 Nature III. 193/1 Evidence...that the Ammonitina, with their distinct embryos, arose from the orthoceran stock.

Orthocerastite (*ɔɹθɒsɛ·rəstəɪt*). Also in Lat. form **orthoceratites** (*-sɪræ·tɪtiːz*). [f. as prec. + -ITE 1 2.] A fossil shell of the genus *Orthoceras* or family *Orthoceratidæ*; also, as synonym of this genus or family.

1734 *Phil. Trans.* XLVIII. 800 The orthocerastites is a pellucid transparent shell, ending in a point. 1788 *Phil. Trans.* LXXVI. 321 Belemnites, orthoceratites, and so on, are all one animal. 1871 Hawkins *Dudleyan.* II. 5, 18 In the more ancient Palæozoic rocks flourished the Orthoceratites, or straight-chambered shells, resembling a cuttle-fish uncoiled.

Add. 1883 Tr. Rose *Handbook's Trans.* III. 2228 The orthoceratites limestone of the Ashgabatsa.

Hence **Orthocerati·tic** (*ɔɹθɒsɛrɪtɪ·tɪk*) *a.*, pertaining to or resembling an orthoceratite. So also **Orthocerotoid** (*-sɛ·rɒtɔɪd*) *a.* = *orthoceratitic*; *sb.* = *orthoceratite*.

Orthochromatic (*ɔɹθɒkrəmæ·tɪk*), *a. Photogr.* [f. Ortho- 'correct, proper' + Gr. *χρωματικός* relating to colour, Chromatic.] Representing colours in their correct relations, *i.e.* without exaggerating the deepness of some and the brightness of others (as in ordinary photography).

1887 *Athenæum* 26 Mar. 401/1 The colours were purposely selected to test as severely as possible the capacity of the plate used—a Thiarc's orthochromatic. 1889 *Phot. Mosaics* 21 Aug. 256 We want photography to be orthochromatic, or colour-correct. 1890 Anthn M. Camera *Jrnl. Amer.* 30 'Orthochromatic' plates absolutely free from colour-preferences can be produced by special processes.

hence **Orthochromatism** (*-krɒ·mətɪzm*), the condition of being orthochromatic; **Orthochromatize** *v. trans.*, to render orthochromatic.

1889 *Abney's Photogr. Instr.* II. 323 In order to obtain true orthochromatism it is always necessary...to interpose a transparent yellow screen somewhere between the object and the plate in order to cut off a certain proportion of the blue and violet rays, to which the plate, still remain relatively too sensitive. 1890 *Nature* 18 Dec. 161/1 We will give an easy method by which any gelatine dry-plate can be orthochromatized. 1892 W. J. Stillman in *Nation* (N. Y.) 13 Dec. 418/1 'Orthochromatism' avoids the glaring contrasts which need to be made by photography between the color-values of blues, yellows, and reds.

Orthoclase (*ɔ·ɹθɒklēz*). *Min.* [mod. (Breithaupt, 1823) f. Ortho- 'straight, right' + Gr. *κλάσις* breaking, cleavage.] Common or potash feldspar, a silicate of aluminium and potassium, occurring in crystals or masses of various colours, characterized by two cleavages at right angles to each other.

1849 Nicol *Min.* 119 All orthoclase from trachyte contains soda along with the potash. 1883 S. B. Gayler *Pocket. Crystal. Pocket* 142 The felspar of this quarry is of two kinds, orthoclase and oligoclase, in large masses, the former pink, and the latter quite white. 1901 Dalrymple *Min.* 83 Common orthoclase is extremely rare as a glass.

Orthodox (*ɔ·ɹθɒdɒks*) *a.* and *sb.* [Ultimately f. Gr. *ὀρθόδοξος* right in opinion, f. *ὀρθό-* + *δόξα* opinion. Cf. late L. *orthodoxus* (Jerome *Codex Jacut.*), and F. *orthodoxe* (a 1488 in Godef. *Compl.*), which may have been the proximate sources.]

The full ancient designation is ἡ ἁγία ἀποστολικὴ καθολικὴ ἀνατολικὴ ἐκκλησία, 'the holy, orthodox, catholic, apostolic Eastern church'. The epithet 'Orthodox' was originally assumed to distinguish it from the various divisions of the Eastern Church, e.g. the Jacobites or Monophysites, Nestorians, etc., which separated on points of doctrine, and have not accepted all the decrees of the ecumenical councils; but it is sometimes used by Historical writers as opposed to 'Catholic'. -ory[1], formerly -orie, a suffix forming *sbs.* originating in ONorm. Fr. and AFr. *-orie* = Central Fr. *-oire*, as in *gloria*, *gloire*, which became the basis for the adaptation of L. words in *-ōria*, and subseq. of these to *-ōrium*, as *victoire*, *offertoire*, *oratoire*, *purgatoire*; these also took in Eng. the form *-orie*, later *-ory*, which thus came to be the normal Eng. repr. of L. *-ōria*, *-ōrium*, F. *-oire*. The most numerous of these are adaptations of L. neuter *sbs.* in *-ōrium*, from adjs. in *-ōrius* (see *-ory*[2]), or formations of the same type. Usually, these denote a place or instrument used in some process, as *crematory*, *directory*, *dormitory*, *factory*, *laboratory*, *lavatory*, *observatory*, *oratory*, *purgatory*, *refectory*, *repository*, *salitatory*, *sudatory*; but occasionally they have other senses, as *auditory*, *promontory*, *territory*. In some learned or technical words the L. form in *-ōrium* is retained; thus *auditorium* is differentiated from *auditory*, *crematorium* is more frequent than *crematory*. In a few words *-ory* is the suffix *-y* added to an agent-noun in *-or*, e.g. *orator-y* (the art of the orator), *rector-y* (the seat of a rector).

-ory[2], formerly -orie, a suffix forming adjs. (whence also *sbs.*), originating in ONF. *-orie*, *-orie*, and repr. (sometimes through OF. *-oir*, *-oire*) L. *-ōri-us*, *-a*, *-um*, itself a compound suffix consisting of the adj. formative *-i-us* added to derivative *sbs.* in *-or* (cf. *terr-is* *tōrr-is*, *cassid-is* *-id-is*), chiefly agent-nouns in *-tor*, *-sor* (see *-or*[3]), but sometimes app. from the cognate ppl. stem in *-t-*, *-s-*; e.g. *accusātōr-i-us*, *amātōr-i-us*, *dīcātōr-i-us*. As to agent-in. in *-or* is possible from every L. vb., as adj. in L. *-tōr-ius*, Eng. *-tor-y* is also always possible, and is often in Eng. use when no corresponding L. adj. is recorded, and even when no agent-n. occurs; thus, we have *compulsory*, *dispensatory*, *illusory*, *persuasory*, without the agent-nouns *compulsor*, etc., and *cursatory*, *hortatory*, *perfunctory*, *predatory*, where the L. verb is not even represented in English. Instead of *-ory*, the Eng. adj. has often the extended form *-orial*, less frequently *-orious*.

Ose, obs. form of Ooze.

-ose [1, a suffix representing Latin *-ōsus*, forming adjs. from substantives, with the meaning 'full of', 'abounding in'; e.g. *anno-ōsus* full of years, *glōri-ōsus* scrooning, *opŭl-ōsus* rich, *pecūni-ōsus* moneyed, *religi-ōsus* scrupulous. As a living suffix *-ose* came down to OF. as *-ous, -eus*, later *-eux, -euse*, AF. and Eng. *-ous* (ME. also *-ouse*), which survives with pronunciation (*-oz*). But from the 15th c. onward there was a tendency to alter *-ous* words to *-ose* after L., as seen in such forms as *ambitiose, glorieuse, malitiose, pompose, virtuose, zelose.* None of these displaced the earlier forms in *-ous*; but a few words formed directly from L. from the

13th c. onward have taken their place in the language, as *hellénos, glúkos* (1438 tr.), *ákoitos, nárkosis, narkósai* (1766 tr.), *ithónē* (1818 tr.), *gnomónikos, plásmos* (1828 tr.). In a few cases *-ose* and *-ōse* forms are both in use, e.g. *acetose, acetóse, adenose, adénose*, these in *-ose* being more technical. Originally these words have the stress on the suffix, *fau'se, sucro'se*, but this is not always maintained to more recent usage, esp. in words of more than two syllables. Names of state from these suffs. as from those in *-ose*, end in *-osity*: *glúcosity, narkosity*.

-ose[1], *Chem.*, a suffix originating in the ending of the word *glucose*, and employed in forming the names of the related carbo-hydrates, *saccharose* and *cellulose*, with the isomers of these three, as *dextrose, levulose, dambose, galactose, mannitose*; *lactose, maltose, melezitose, melibiose, sucrose, cymanthrose, trehalose*; *amylose*, etc.

These formations are due to the French chemists, and the earlier of them appeared first in Fr. words. *Glucose* was so named by the committee of the *Académie des Sciences* (Thénard, Gay-Lussac, Biot, Dumas), who reported in July 1838 upon the memoirs of Dubrunfaut: 'Il semble que le sucre de canne, celui d'amidon, celui de diabètes, et celui de miel ...contiennent un seul corps, une sous-permanente d'oxygène glucose. (Mots: *glucose* [*glycose*, 1838 *mucose*, *the Sucre*.' *Complete Scientific* VII. 108 (1838). Glucose was thus merely a falsified representation of the Gr. word *glukus* 'sweet, sweet wine, sweetness', with *o* for *u* and *-ose* for *-us*. Liebig's assumption that the name was derived from *glukus* sweet, in accordance with which he assigned to *sucre* it to *glucose*, was thus historically erroneous.) The name *cellulose* was given by Braconnot, Pelouze, and Dumas, in reporting upon the researches of Payen, 14 Jan. 1839: 'Nous offrons, il y a deux ans, à nos lecteurs, la découverte d'une substance particulière, qui est le plus abondant des produits organiques ...Nous avons proposé le nom de cellulose pour désigner cette substance, qui constitue le tissu propre de tous les végétaux, et qui constitue le squelette fibreux de leurs différents organes.' *C. R.* VIII. 51 (1839). *Cellulose* was thus formed on *cellule*, but there is no evidence that its inventors thought of it as, adj. 'cellulose' and app. the ending *-ose* was given simply to match *glucose*. It appears from other statements that the actual author of *glucose*, and presumably also of *cellulose*, was Dumas, the *rapporteur* of the committee. The ending *-ose* was soon extended: *composition of Lamoglucose* (Berthelot) and *dextroglucose* (Kekulé) gave *levulose* and *dextrose*, and the forms *lactose, maltose*, etc. followed.

-osis, *suffix*, representing Gr. *-ωσις*, originating in the addition of the general suffix *-ωσ-* forming verbal nouns of action or condition, to derivative vbs. in *-όω* from adj. and sb. stems or combining forms in *o-*: e.g. *διαύγασις* darkening, obscuration of sight, amaurosis, f. *διαυγά-ω* to darken, f. *διαυγὴς* dark; *μεταμόρφωσις* transformation, f. *μεταμορφό-ω*, f. *μετά* + *μορφή* form. Many such words also were formed directly from the sbs. or adjs. themselves, or their compounds, without the intervention of a vb. in *-ώω*, e.g. *βάθυσις* malignant ulcer, sethrosis, f. *βάθος*, *βαθυσκελ-ής*, *ἐξόστωσις* outgrowth of bone, exostosis, f. *ἐξ* out + *ὀστέο-ν* bone.

Many of these Greek terms have been adopted in Latin ancient or modern, whence they have passed into English use, e.g. *anastomosis, apotheosis, metamorphosis*, rhetorical terms, as *anacoluthia, mimesis*, and esp. medical terms, as *amaurosis, anchylosis, cyphosis, exostosis, sclerosis, thrombosis*, etc. On the analogy of these last, others have been freely formed in mod.L., Eng., and other modern langs., from Greek elements, as *chlorosis, cyanosis, ichthyosis, trichinosis*; less frequently from Latin, as *pediculosis, tuberculosis*. The stress is etymologically *-ō'sĭs*; but popular use has shifted it to *metamorphō'sis*; so *amaurō'sis*, etc. The Gen. form of the ending is also *-ōsis*, the French is *-ose*.

Osite (*ō·sīt*). [irreg. for **osate*, f. L. *os*, *ossi-* bone + *-ITE*[1].] A deposit, found on the island of Seaforce in the West Indies, consisting largely of the bones of turtles and other marine vertebrates; also called *Seaforce guano*.

Osse, oss (*ŏs*), *v.* Now *dial.* [Found in w. mid. dialect in 14th c., and still common from the Welsh Border to Cumberland and Northampton; much affected by Ph. Holland in his versions of Latin authors, to render *desiderō* and its synonyms, as is Ossa *sb.* to render *Imago*. The latter has not been found in previous writers, though Holland (who, as Head Master of Coventry Free School, had opportunity of knowing the facts) refers to both *sb.* and *vb.* as old words well known in the North. (See Ossa *sb.* quot. 1600.) According to the known evidence, the *sb.* appears to be derived from the *vb.*, but the origin of both is involved in obscurity.

Holland was confirmed in his use of these words by inferring (how to be derived from Gr. here 'ominous voice or sound, prophecy, premonition', the subsidiary of which and to *vb.* *ἀνα-αύω*, 'to presage, foretokken, foreshew' which one *sb.* and *vb.* is peculiarly very remarkable; yet it is impossible that an English *vb.* in popular use in the 14th c. could be derived from Greek without many intermediate links, of which in this case none are found. The verb is also used in mod. colloquial Welsh as *osio* 'to give token of, show promise of', but in the opinion of Prof. Rhŷs and Dr. Silvan Evans, this is merely a recent adoption from the adjacent English dialects. (Rhŷs's conjecture of identity with *F. oser* 'to dare' (Sandfeld on a modern dialect use), is phonetically and historically futile.)]

The ossifrage of Pliny is identified by modern naturalists with the Lammergeyer, which swallows and digests bones, and is said to let them fall from a great height upon rocks and stones so as to break them. But the name appears to have been early transferred in France and England to the Fish-hawk, to which, in its assumed modern forms *orfraie*, *osprey*, it is now applied. *Ossifrage* has subsequently been taken directly from the L. form, either simply to render the L., or to name the bird held to be meant by Pliny, but has sometimes been used merely as a synonym of Osprey. The habits and peculiarities of the bird, real and fabulous, have afforded much scope for pseudo and allusion; such are its indiscriminate voracity and its liking for hard substances, which it swallows to assist the gizzard in its functions; its supposed want of regard for its young, its eggs being partly hatched by the heat of the sun, which has led to the belief that it deserts its nest; and the practice attributed to it of thrusting its head into the sand or a bush when being overtaken by pursuers, through incapacity to distinguish between seeing and being seen.

This would now be implied by its omission; to mention nor the insertion of *other* implies the opposite, viz. that the second class includes the first.

C. Peculiar written combinations and divisions of *an other, none other, the other*, in A. and B.

a. In ME. writing, *an other, non another*, was often divided as a matter. Similarly, non (*nan*) *other, non no* (*nan*) *other* was written no (*na*) nother. In ME. and early mod.Eng. *the other* was often written thother. These forms are now obs.

b. In Early ME., *þat ofer*=OE. *þæt ðæs oðer*, neuter of *se ðæs, ðære, ðæt oðer*, the other, was (app. first in northern, north midl. and east midl. dialects) extended to all genders, and at length analysed as *þe ofer*, the *other*. See Tother. Cf. also To adj., Tone *pron.*

By some writers the *tone*, *the tother*, were altered by way of correction to *that one*, *that other*.

D. *Used.*

†**Other**, *conj.* and *adv.*[2] *Obs.* Forms: 2–4 *oþer*, 2–6 *other*, 4–5 *oþere*, *othire*, *othir*, *-yre*, 4–6 *uther*; 6 *oder*, *-er*. *β.* 4 *oiper*, *oither*. [The OE. word for 'or' (*E. ea.* L. *aut*, and *vel* or *vel*, G. *oder*) was *oðða*, earlier *oðþe* (also *oððe*) = Goth. *aiþþau*, OS. *ofto*, *oðdo*, OHG. *edde*, *odo*, later *oda*, MHG. *ode*, *oder*, Gen. *oder*. The alternative 'either ... or' was expressed by *oðþe ... oðþe*. This form was superseded *c* 1130 by *ofter* (first in O. E. Chron., anno 1127; last example of *oðþe*, in a sentence in which *oðer* also occurs, 1131). The MS. of the OE. transl. of Beda's *Ecclesiast* (1000–1024) has regularly *oðer* for OE. *oðþe*.

Though the date of the first appearance of this conj. is as accurately defined, its actual source remains a debated question. It has been held to be identical with the adj. *other*, Ormin (see prec.), and more frequently with the adj. *prou*, Ormin, OE. *ælmeðer*, *ælðer*, *æðer*. Both these grammatical words were failed to OE. past participles, to introduce the alternative *oðþe ... oðþe* ... (see Ormin, *ælðer*, prou. E. 2 b, Ormin *ælðer prou*. 1761) but there is no trace in OE. of *oðer* (*ofter* or *other* taking the place of the first member of the alternative *oðþe* ... *oðþe* ... ; much less of both members, and least of all of the simple conj. *oðþe*. On the contrary, the simple conj. remained invariably *oðþe*, and the alternative (as far as the evidence shows) *oðþe ... oðþe* ... down to the abrupt substitution of *ofter* c 1130. It is true that in the 12th c. in northern, north midl. and e. midl. Eng., *ouþer*, *auþer*, began to take the place of *oðer* as first member of the alternative *oðer ... oðer* ... or *oðer ... or* ... (the normal remaining as *or*, less usually *other*), just as later still (in Wyclif and Chaucer) *either* became the medieval form of the first member; but these were changes in several centuries later than the substitution of *oðer* for *oðþe* c 1130, with which they have no historical connection. It seems more probable that the *oðer* or *ofter* of 1130 was a modification of *oðþe* itself, due to some association with words in *-er*; *oðþe* being a monosyllable would be peculiarly subject to pronunciation in *oðer*. Of names from earlier writers (1040) Bede *oðþe*, etc.). There are no remainder of the peculiarities of development between HG. *oda*, *ode*, *oder*, *ader*, and OE. *oðða*, *oðþe*, *oðer*, *æðer*, *ofter* or *ofter*) and we are led to suspect, for the *r* of German

other and of ME. *ofer*, the same as a similar explanation. The form *ether* used by the early 19th c. scribe of Hatfield has many others in his accentuation of the *o*ths of the original in the *ether* of his own day, or an actual intermediate form. It does not seem possible to fix the quantity of the *o* in ME. *ofer*, even from Ormin's spelling; but, if decided from *oth*, *nath*, it was presumably short. Ormin's ordered form *ofer* and *oer* (see Ur. 4005), and the later *or*, had, of course, short *o*, from which the *y* of mod. emphatic *oy* so regularly developed.

III. As auxiliary of predication.

5. The general verb to express duty or obligation of any kind; strictly used of moral obligation, but also with various weaker shades of meaning, expressing what is befitting, proper, correct, advisable, or naturally expected. Only in pa. t. (indic. or subj.), which may be either past or present in meaning. (The only current use in standard Eng.)

The subject is properly the person (or thing) bound by the obligation, which is to be expressed by a following infinitive (with, formerly also without, *to*), sometimes omitted by ellipsis. Followed by a passive infinitive, it expresses obligation on the part of some undefined or unexpressed agent, the subject in this case being the person, etc. to whom the obligation is due (= *A. parents ought to be honoured* = it is a duty to honour parents).

a. In past sense: = Owed it to duty; was (were) bound or under obligation (*to do* something). Usually, now only, in dependent clause, corresponding to a preceding past tense in principal clause: *he said you ought* = he said it was your duty. (Cf. 2 below.)

b. In present sense: = Am (is, are) bound or under obligation; *you ought to do it* = it is your duty to do it; *it ought to be done* = it is right that it should be done, it is a duty (or some one's duty) to do it. (The most frequent use throughout. Formerly expressed by the pres. t., Owe v. 5.)

This appears to be only the pa. subj. (which in ME. and mod.Eng. has the same form as the indic.) used first in hypothetical or general cases: e.g. Ought one to tell the truth, under all circumstances? If I should take, he ought not to go. If he cannot go to-day, he ought to go to-morrow. Thence, in definite present cases, as Tell me what I ought to do now. The use of the pa. subj. softens the force of the suppression: cf. the parallel *you should* for *it is your duty*; *you would* for *you will*; *you might* for *you may*; *could you* for *can you*.

1. A unit of weight; originally, as still in Troy weight, the twelfth of a pound, but in avoirdupois or ordinary goods weight the sixteenth of the pound.

This Troy ounce consists of 480 grains, and is divided into 20 pennyweights; the avoirdupois ounce contains 437·5 grains, and is divided into 16 drams. *Fluid ounce*, a measure of capacity, containing an avoird. ounce of distilled water at 60° Fahr.; = 0·9 cubic centimetre. In the United States the fluid ounce is the 128th of a gill or 128th part of a gallon (= 1872 cubic centimetres), containing 458·33 grains of distilled water at its maximum density. It is thus an aliquot part of the pint, quart, and gallon, which the British fluid ounce is not.

-OUS, suffix, repr. L. *-ōs-us* (*-ōs, -ōsa*), forming adjs., with the sense of 'abounding in, full of, characterized by, of the nature of', e. g. *copi-ōs-us* plentiful, copious, *dolōr-ōs-us* full of sorrow, dolorous, *flor-ōs-us* flowery, *gener-ōs-us* distinguished by descent, generous, *glōri-ōs-us* full of glory, glorious, *spin-ōs-us* full of thorns, thorny, SPINOUS, *vēr-ōs-us* of the nature of him-lime, misty, viscous, etc. Latin stressed long *ō* passed in OFr. into a closer sound, intermediate between *ō* and *ū*, which was variously written *o* or *u*, less commonly *ou*; hence L. adjs. in *-ōsus*, which either came down in popular use, or were adopted at an early date, had in OF. forms in *-os, -us* (*-ous*), e.g. *covetos, -us, dolous, -ous, envios, -us, glorios, -us, religios, -us*. In the 13th c. the vowel-sound had changed to *(ə)* written *ou*, so that the suffix had now the form *-ous* (*convoitous, dolerous, envious, glorious*, etc.); and this still later was written in the mase. *-eux* (*convoiteux, envieux, glorieux*, with fem. however in *-euse*), as still in modern F. In Anglo-Fr. and early ME. the forms were the same as in early OF. (*covetos, -us, envios, -us, glorios, -us*), but the vowel was soon identified with OE. long *ō*, and like it written after 1300 *ou* (*covetous, envious, glorious*), the spelling ever since retained, though the sound has passed through (*-ōu, -ūs, -əs*) to (*-əs, -əs*). This *-ous*, having thus become the form of the suffix in all words from Norman Fr., became the established type for all those of later introduction, whether adaptations of Fr. adjs. in *-eux, -euse*, or L. adjs. in *-ōsus* (but see *-ose*[1]), or new formations on the analogy of these, from Fr., L., or other elements.

These new formations are numerous in the Romanic languages. In French they have been formed freely, not only from L. sbs. which had no such derivative in ancient L., but also from French words themselves of L. origin, and from mediæval and modern words from divers sources. Many of these new formations have, in earlier or later times, passed (with change of *-eux, etc.*, to *-ous*) from French into English. Such is the history, for example, of *advantageous, adventurous, courageous, dangerous, gelatinous, gracious, gummous, hazardous, hideous, joyous, lecherous, mutinous, monstrous, orgulous, pulpous, ruinous, riotous, slanderous*. This process has been continued in Eng. itself, where new adjs. in *-ous* have been formed, not only on Latin, Greek, and Romanic bases, but also on native Eng. words and on some of obscure origin; e.g. *blasphemous, boisterous, burdensome, fearsome, murderous, poisonous, slumberous, thunderous, timous, troublous, wondrous*.

In some words in late or mod.L. the ending *-ōsus* was added to an adj., or at least a form in *-ōsus* is found beside the simple adjective, e.g. *decōr-us, dicerōs-us, dulc-us, dulcēd-us*, in *Sl. dicerus, dicerosus, dulcis, dulcitudo*. In the Romanic languages a few new forms of this kind appear; e.g. L. *pī-us*, F. *pi-eux* (as if from **pīōs-us*). But in English, this addition of the suffix has been greatly developed, and has become the ordinary mode of anglicizing L. adjs. of many kinds, esp. those in *-ous, -ius, -uus, -or, -ris, -bi -bis, -bi -bis, -undus, -ulus, -ferus, -ficus*, e.g. *ægue-ous, igne-ous, extraneous, herbaceous, cosmi-ous, abid-ous, mori-ous, arde-ous, exiguous, adulter-ous, mortifer-ous, arvigor-ous, silicri-ous, lilacri-ous, illustri-ous, capaci-ous, forest-ous, depend-ous, parvul-ous, omnifer-ous, somni-ous*.

This tendency to represent a L. adj. by an Eng. form in *-ous* may have been strengthened by the fact that the 'dictionary-form' of the L. adj. is the nom. sing. masc., and that this in the majority of adjs. ends in *-us*, the Eng. pronunciation of which is the same as that of the Eng. word in *-ous*, so that the latter to the cursory observer appears to be merely an Eng. spelling of the L. It is evident however that *igne-ous*, for example, answers not only to L. *igne-us*, but to *igne-a, igne-um*, etc., and that the *-ous* is an additional element. And in comparing *adscri-ous* with *adscri-bere*, *hilari-ous* with *hilari-s*, *rapaci-ous* with *rapax, rapāci-*, the suffixal nature of the *-ous* is manifest.

b. In some words, *-ous* is a corruption of another suffix, e.g. in *righteous, covetous, courteous, gorgeous*; in others, as *bounteous*, a contraction of an earlier suffix has taken place before *-ous*: see -EOUS.

c. In *Chem.*, adjectives in *-ous*, formed on the names of elements, fulminic acids and other compounds containing a larger proportion of the element in question than those expressed by an adj. in *-ic*: e.g. *chlorous acid, sulphurous acid, saltpetrous salts, ferrous salts*, etc.: see -IC 1 b.

d. Nouns of quality from adjs. in *-ous* (however derived), are regularly formed in *-ousness*, as *covetousness, courteousness, gorgeousness, righteousness*; those from L. *-itas* have sometimes forms in *-osity*, as *curiosity, generosity, porosity*, usually; but this termination more frequently accompanies adjs. in *-ose*[1].

Out, obs. form of Ought, Aught.

Out- is used, in most with substantives, with verbs and their derivatives, and with other adverbs.

In OE. *ūt adv.* was closely prefixed to or ordinary the in the sense 'that is without', 'not lying', 'external', as in *ūtland* n. country that is out, a district or foreign land, *ūthere* an army belonging to, or coming from without, a foreign army; (c) to verbal the, and nouns: verbs and nouns-nouns derived from verbal roots, as *ūtfaran, ūtfara, ūtfærelā, ūtgang*, going out, exit, departure, *ūtlēof expedition, ūtsittere* one who drives out, *ūtsīd* carriage out, expectation, *ūtsyne* running out, occupation, enquiry; (d) to adjectives forming adjs., subjectively related to the adj. (e.g. *ūtgenge, ūtstandan, ūtwlite*, foreign, as derived from the *vbls. ūtgān, ūtstandan*, running, gangrene. In these 'nominal compounds' the sense was always on the prefix.

With verbs, of the other adverbs formed separable collocations or semi-compounds, in which the position of the adv. was shifted according to the construction of the sentence, as in the separable compound verbs of modern German (although in OE. the order was not yet so rigid). Thus, as followed the vb. in the imperative, as *gā ūt!* and *ūt fram hūse*, and in the past, and pa. indicative in the principal sentence, as *he cwæð ūt, he wolde ūt, he fōgeta hē ūt.* But in the dependent sentence, and in all other moods or parts of the vb., including the infinitive and participles, and all nominal derivatives, the adv. stood immediately in front of the vb.; thus *hī hē ūt cwæð* when he comes out, *gif he ūt cyme* if he come out, *nā mōlde me ūt gān* now will we go out, *ūt gangendum fram scipe* on the ninth going out. In OE. the adv. was regularly written separate; but in translations from Latin, compound verbs in *ex-* were sometimes rendered by compound vbs. in *ūt-* in which the adv. was only joined, but even combined before the vb. in the principal sentence: e.g. Ps. cxlii. 3, 'in omnem tentum vulvis meum sunum', *Vesp. Ps.* 'in ūt wurðen wundrunge mīne lenge'. The regular position of *ūt* before the vb. in the inf., gerund, and pples., naturally tended to make the collocation pass into a combination, so that these were used as adjs. or subs.: and this is the cause why *sudgenge, sudgenes, sudgenne* belong to mending to *gō ond, sudgenlic* mending, *sudsittend* (at to *sittan ond*, *sudgenning, sudgenneth to grow out, sudlēod, sudlēofor* to *lēoð ond*. It is only in later Eng. that such collocations as *a going out dress*, a *charging out of cupboards*, the *bringing out of a new play*, a *well thought-out article*, have become possible.

As to the results themselves, in ME., usage became more lax. On the one hand, the adv. began to be placed after or away from the vb. in the subordinate sentence, the inflexion, etc.) on the other hand the older usage of the inf. to *ut gon*, and the like, was often extended to the following, so that we find *to out pede, the kind out breed*. This was partly due to a general levelling and loss of old grammatical distinctions, as that between *to drawe out* and *thow drawe to out*, it became allowable also to say *he out drawe* and *out drawe*, &c. in both of which the adv. stands before the vb. These variations in word order were especially employed by metrical writers as facilitating the exigencies of rhythm and rime, and it is chiefly in metrical compositions that they are found. But they are scarce in translations from Latin, as e.g. in the works of Wyclif, in which *v.* vbs in -ir- are constantly rendered by Eng. verbs preceded by out-. In MS. the elements were still commonly separated in writing; but modern editors have usually hyphened these collocations as compounds.

As a result of these various causes, there are numerous post-compound vbs. in *out-* in occasional use, chiefly poetical, in precisely the same sense as the ordinary prose form in which the simple verb is followed by the adv., e.g. *out-pour = pour out.* Not unfrequently, moreover, where *out* stands before a vb. as a mere particle or poetical licentiate, as in 'A frightful chasm: from the wall out broke', 'Out went the torrent all in vain', the two words, though purely inversions of *broke out, went out*, are hyphened as if compounds. The tendency so to treat them is probably strengthened by the existence of *outbreak (sb.), outbreaker, outbreaking, outbreak, outcast, outcasting*, and the like. But in these latter the position of the *adv.* is original, and the stress is on *out*, while in *out-break, out-went*, the stress is on the vb.

On these accounts it is difficult to deal satisfactorily with the hyphened post-compounds in *out-*. Such as mere inversions, or occur as senses of *out-* verbs having other senses, are given among the Main words (where it is often indicated that they are not true compounds, or are only poetical); others are given in this article, but no attempt has been made to enumerate these. The more in type of *ūtdrīfan, -gān* and ppl. adjs. in *-drīfe, -gān*, etc., and agent-nouns in *-er*, which are permanent possibilities from any verb that can be followed by *out*, as in *outgoing, out-goer, outpour*, from *go out*.

True compound vbs. in *out-* are those in which it impacts the sense of outdoing, surpassing, exceeding, or leaving in some action, as in *outlive, outlast, outnumber, outlive*, and the various formations of those contained in C. II. These are of late origin: a very few (e.g. *outlive, outlengthe = outlast, outpay = repay*) in the 14th c.; they increase gradually during the 16th c. (*outrun* in Tyndale, *out-cry, out-cast, outgo, outrule, outrow, outrun*, in Palsgr.), and become numerous only c 1800, being freely and boldly employed by Shakspere, who in one earliest authority for many of them, including the curious group typified by 'to outbrave a from me', 'to out-Herod Herod'. It is not very clear how this use arose, or to what sense of *out* it is to be referred. But the earlier of these *out*-compounds were in nearly every instance preceded by a form with *over-*. Thus *outlive* (1340) was preceded in same sense by *overlive* (in OE.) = *F. survivre*; *outpass* in the Weser of Thames engravings his boundary (1249) was preceded by *overpass* = *F. surpasser*. It would seem therefore that *out-* has here the sense of 'beyond'. It is possible however that *to outlive* (here second) in some association with Out *adv.* 13, as if 'to live to see another *out* or to an end'. One who outlives another, lets *beyond* his rival until he drives him *out* of the course. Cf. also the relation of the two notions in 'the ship outside the moon', and 'the lieutenant outrode his garment', or 'he outrode all competitors in the race'.

A. *Out-* in comb. forming *sbs.*

1. In combination with ordinary *sbs.*

Of these a few existed already in OE., e.g. *ūtland* outside or outlying land, foreign land, Outland, *wīdgrund* the outer sense (see Outer), *ūtgemære* exterior boundary, *ūtheall* external side, *outside*, *ūtwudu* outlying wood; *ūthere* foreign army, *ūtsciðe* outlying pirate or viking. The number of these has in later times been greatly increased. These of longer standing are written as single words; in the more recent, the two elements are usually hyphened, but they are also sometimes written separately, in which case *out* functions as an *adj.*, = 'external, exterior, outlying, outer': see Out *a.* As the meaning in the same either way, the separation or hyphening of the two elements is in many cases optional. (Cf. Back-.)

App. representing an OE. **út-hæs*, f. *út* OUT + *hæs* command, bidding, *calling upon (any one) by name (from *hátan* to call by name, call upon), which also had in 13th c. the two forms *hés*, *hest*: see HEST *sb.*

Common in 13th c. in legal documents in the Latin form *utheştum, Anthestum, hutlestum*, and later *Anteres*. These have been sometimes thought to be the source of the ME. word, and to be themselves of OE. origin, derived from *hegan, hycgan*, to carry, etc. And 197 (in 2 MS. but not 197), which suits the sense perfectly. But Anthestum cannot be etymologically accounted for from this source, nor is the word known in any form, Latin or vernacular, outside England. On the other hand, *útháest* as a substantive of ME. action is quite in order. It is very likely, however, that *Anthestum* and 1088 mean: *Anthestum* are Norman Fr. alterations, due to association with *Anta*, for *Andu*. 2 Mich. sufficers are also more easily explicable as Anglo-Norman formations from *outhergan*. As to the sense, *útháest* could hardly mean 'outcry', but might well be the 'calling upon' people to the pursuit of a thief or other ill-doer, which is the sense in the oldest and other of the quots. (Compare the expressions *hrare cleopunga, hrare hafelunan, hrare le &c.*)]

An outcry, raised against a thief or the like, hue and cry; also, outcry generally, clamour.
